PROFESSIONAL SUMMARY

Software Engineer with 2.5+ years of experience designing and developing scalable backend systems using **Java, Spring Boot, Microservices, Kafka, Redis, PostgreSQL, and AWS**. Experienced in building **REST APIs, distributed systems, event-driven architectures, and high-throughput data processing pipelines**. Proven track record of improving application performance, optimizing databases, and delivering reliable cloud-native solutions for enterprise applications. Hands-on experience with **Generative AI, LLMs, RAG, LangChain, and OpenAI APIs**.

SKILLS

Languages	Java, Python, JavaScript, SQL
Backend Development	Spring Boot, Microservices, REST APIs, Spring Security, JWT, JPA, Hibernate
Frontend Development	React.js, HTML5, CSS3
Distributed Systems	Apache Kafka, Debezium, Asynchronous Processing, Multithreading, Event-Driven Architecture
Databases	PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, ClickHouse
Cloud & DevOps	AWS (EC2, S3, RDS, IAM), Docker, Kubernetes, CI/CD Pipelines
AI / Generative AI	Generative AI, LLMs, RAG, LangChain, OpenAI APIs, Vector Databases
Tools	Git, GitHub, Maven, Swagger/OpenAPI, Postman
Software Engineering	Data Structures & Algorithms, OOP, Design Patterns, DBMS, OS, Computer Networks

EXPERIENCE

Software Engineer April 2024 – Present
Fission Labs *Hyderabad, India*

Workforce Intelligence Platform

- Developed and maintained **Spring Boot** microservices on **AWS** supporting workforce intelligence, talent analytics, and skills management workflows.
- Built and secured **20+ REST APIs** using Spring Boot, Spring Security, and **JWT** authentication, enabling seamless integration across enterprise applications.
- Integrated AI-powered skills inference and workforce mapping services, enabling automated talent intelligence and workforce insights across organizational datasets.
- Optimized **Hibernate/JPA** queries, database indexing strategies, and fetch plans, improving query performance and application responsiveness under high-concurrency workloads.

Skills Passport

- Reduced API latency by **60%** by implementing **Redis distributed caching** and optimizing PostgreSQL queries.
- Built a fault-tolerant **Change Data Capture (CDC) pipeline** using **Kafka and Debezium** to synchronize PostgreSQL data with Elasticsearch and **ClickHouse**.
- Architected a high-throughput **real-time analytics pipeline** using **ClickHouse** to process millions of events, enabling near real-time cross-platform insights and scalable analytical reporting.
- Developed **multithreaded CSV ingestion services**, improving bulk processing throughput by **15%**.

PERSONAL PROJECTS

- **Cricket Pool Game** (GitHub)
  - Built a secure **Spring Boot** cricket pool platform with **JWT authentication** and role-based access control, implementing transaction validation and payout workflows to prevent duplicate transactions and maintain data consistency.
- **Real-Time Analytics Platform**
  - Developed event-driven services using **Apache Kafka** for real-time data processing and asynchronous communication. Built scalable analytics APIs supporting high-volume reporting workloads and designed data pipelines integrating **PostgreSQL, Elasticsearch, and ClickHouse**.

CERTIFICATIONS & ACHIEVEMENTS

- AWS Certified Cloud Practitioner – Credly Link
- AWS Certified AI Practitioner – Credly Link

EDUCATION

B.Tech in Electronics and Communication Engineering CGPA – 7.5
JNTUA College of Engineering Kalikiri August 2020 – May 2023
